

ActivEngage is a virtual learner response system that enables students to contribute to the lesson and respond to questions from their laptops, tablets or mobile handheld devices. This integrated application gives teachers real-time insight into student comprehension and learning progression.

Why ActivEngage?

Communication and collaboration — ActivEngage encourages students to engage, interact with and contribute to lessons while using their existing technology. All students may contribute instantly, creating collaborative discussions and lively debate.

Self-Paced Learning — Allows teachers to assign questions of varying difficulty and gives students the opportunity to register answers at their own pace. Educators can poll the class to determine comprehension then review or re-teach if necessary.

Centrally controlled and scalable — Delivers virtual voting capability across a single classroom, an entire campus or beyond. ActivEngage can be managed at a class-level or centrally on a networked server easing security issues.

Full integration — May be used concurrently with Promethean's existing learner response devices or all Promethean software. Teachers can easily manage multiple methods at once.

Instructional management — Fully functional with ActivProgress, provides the ability to gauge student comprehension, receive instructional support, collaborate with key stakeholders and spot student trends before they become an issue.

Virtual voting for:

Laptop or Desktop
Tablets
Mobile device

Ideal for:

Computer Learning Labs
Mobile Laptop Carts
1:1 Laptop Initiatives
1:1 Mobile Initiatives

The **ActivClassroom** by PROMETHEAN

ActivEngage

Key Features

Flexible — Seamlessly integrates with any ActivClassroom product or any interactive whiteboard

Real-time reporting — Allows teachers to track each student's progress and intervene to improve learning outcomes

Multi platform — Works on both Windows and Mac systems at once, allowing for mixed deployment

Wide range of response types — Enhanced Multiple Choice, True/False, Sort-In-Order, Likert Scales, Numeric and Unlimited Text Entry, and Self-Paced Learning

Portable — Network-based registration delivers virtual voting across a single classroom or entire school; or take learning on the go with an ActivHub

Familiar — Offers students a fun wireless communication tool similar to ones they are already accustomed to

Cost effective — Eliminates need for additional hardware, making the most of existing equipment

The *ActivClassroom by Promethean* creates successful, 360-degree educational environments by connecting technology to human ingenuity, and teachers to their peers, to students, and to a whole new world of learning.
